

Asamer Holding.  
Combined strength over generations.

# Refining.

From agriculture to the exploitation of raw materials to the development of acknowledged specialities: Intelligence is the ability to discriminate, leading to proficiency in all disciplines.

From customized building materials to mineral-based innovations or wine from the cradle of European winegrowing: The production and refining of mineral raw materials has always been at the core of our entrepreneurial mission. It has shaped and coined a dynamic organization continuously reinventing itself on the basis of its natural origin, demonstrating tremendous power and persistency nurtured by clear value concepts.

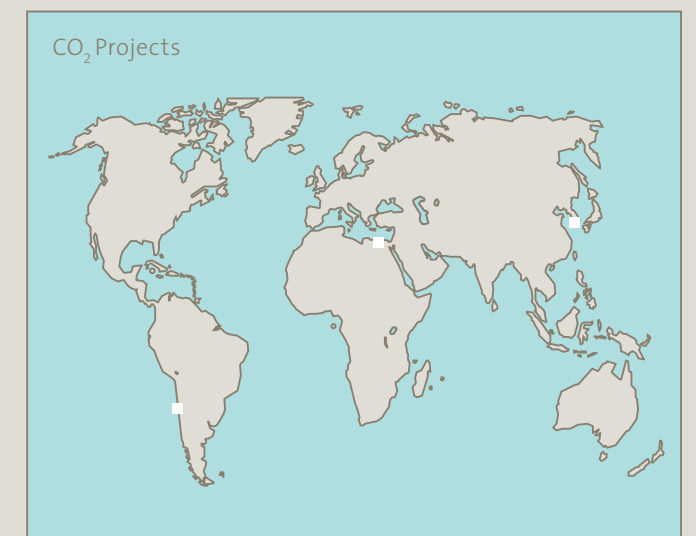

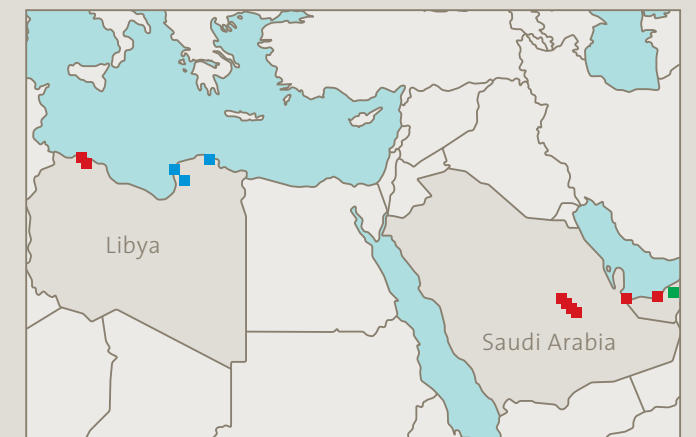

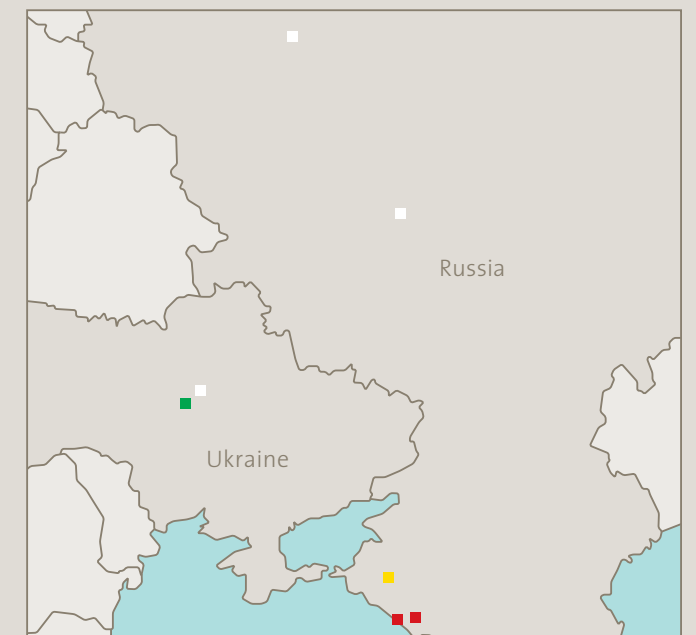

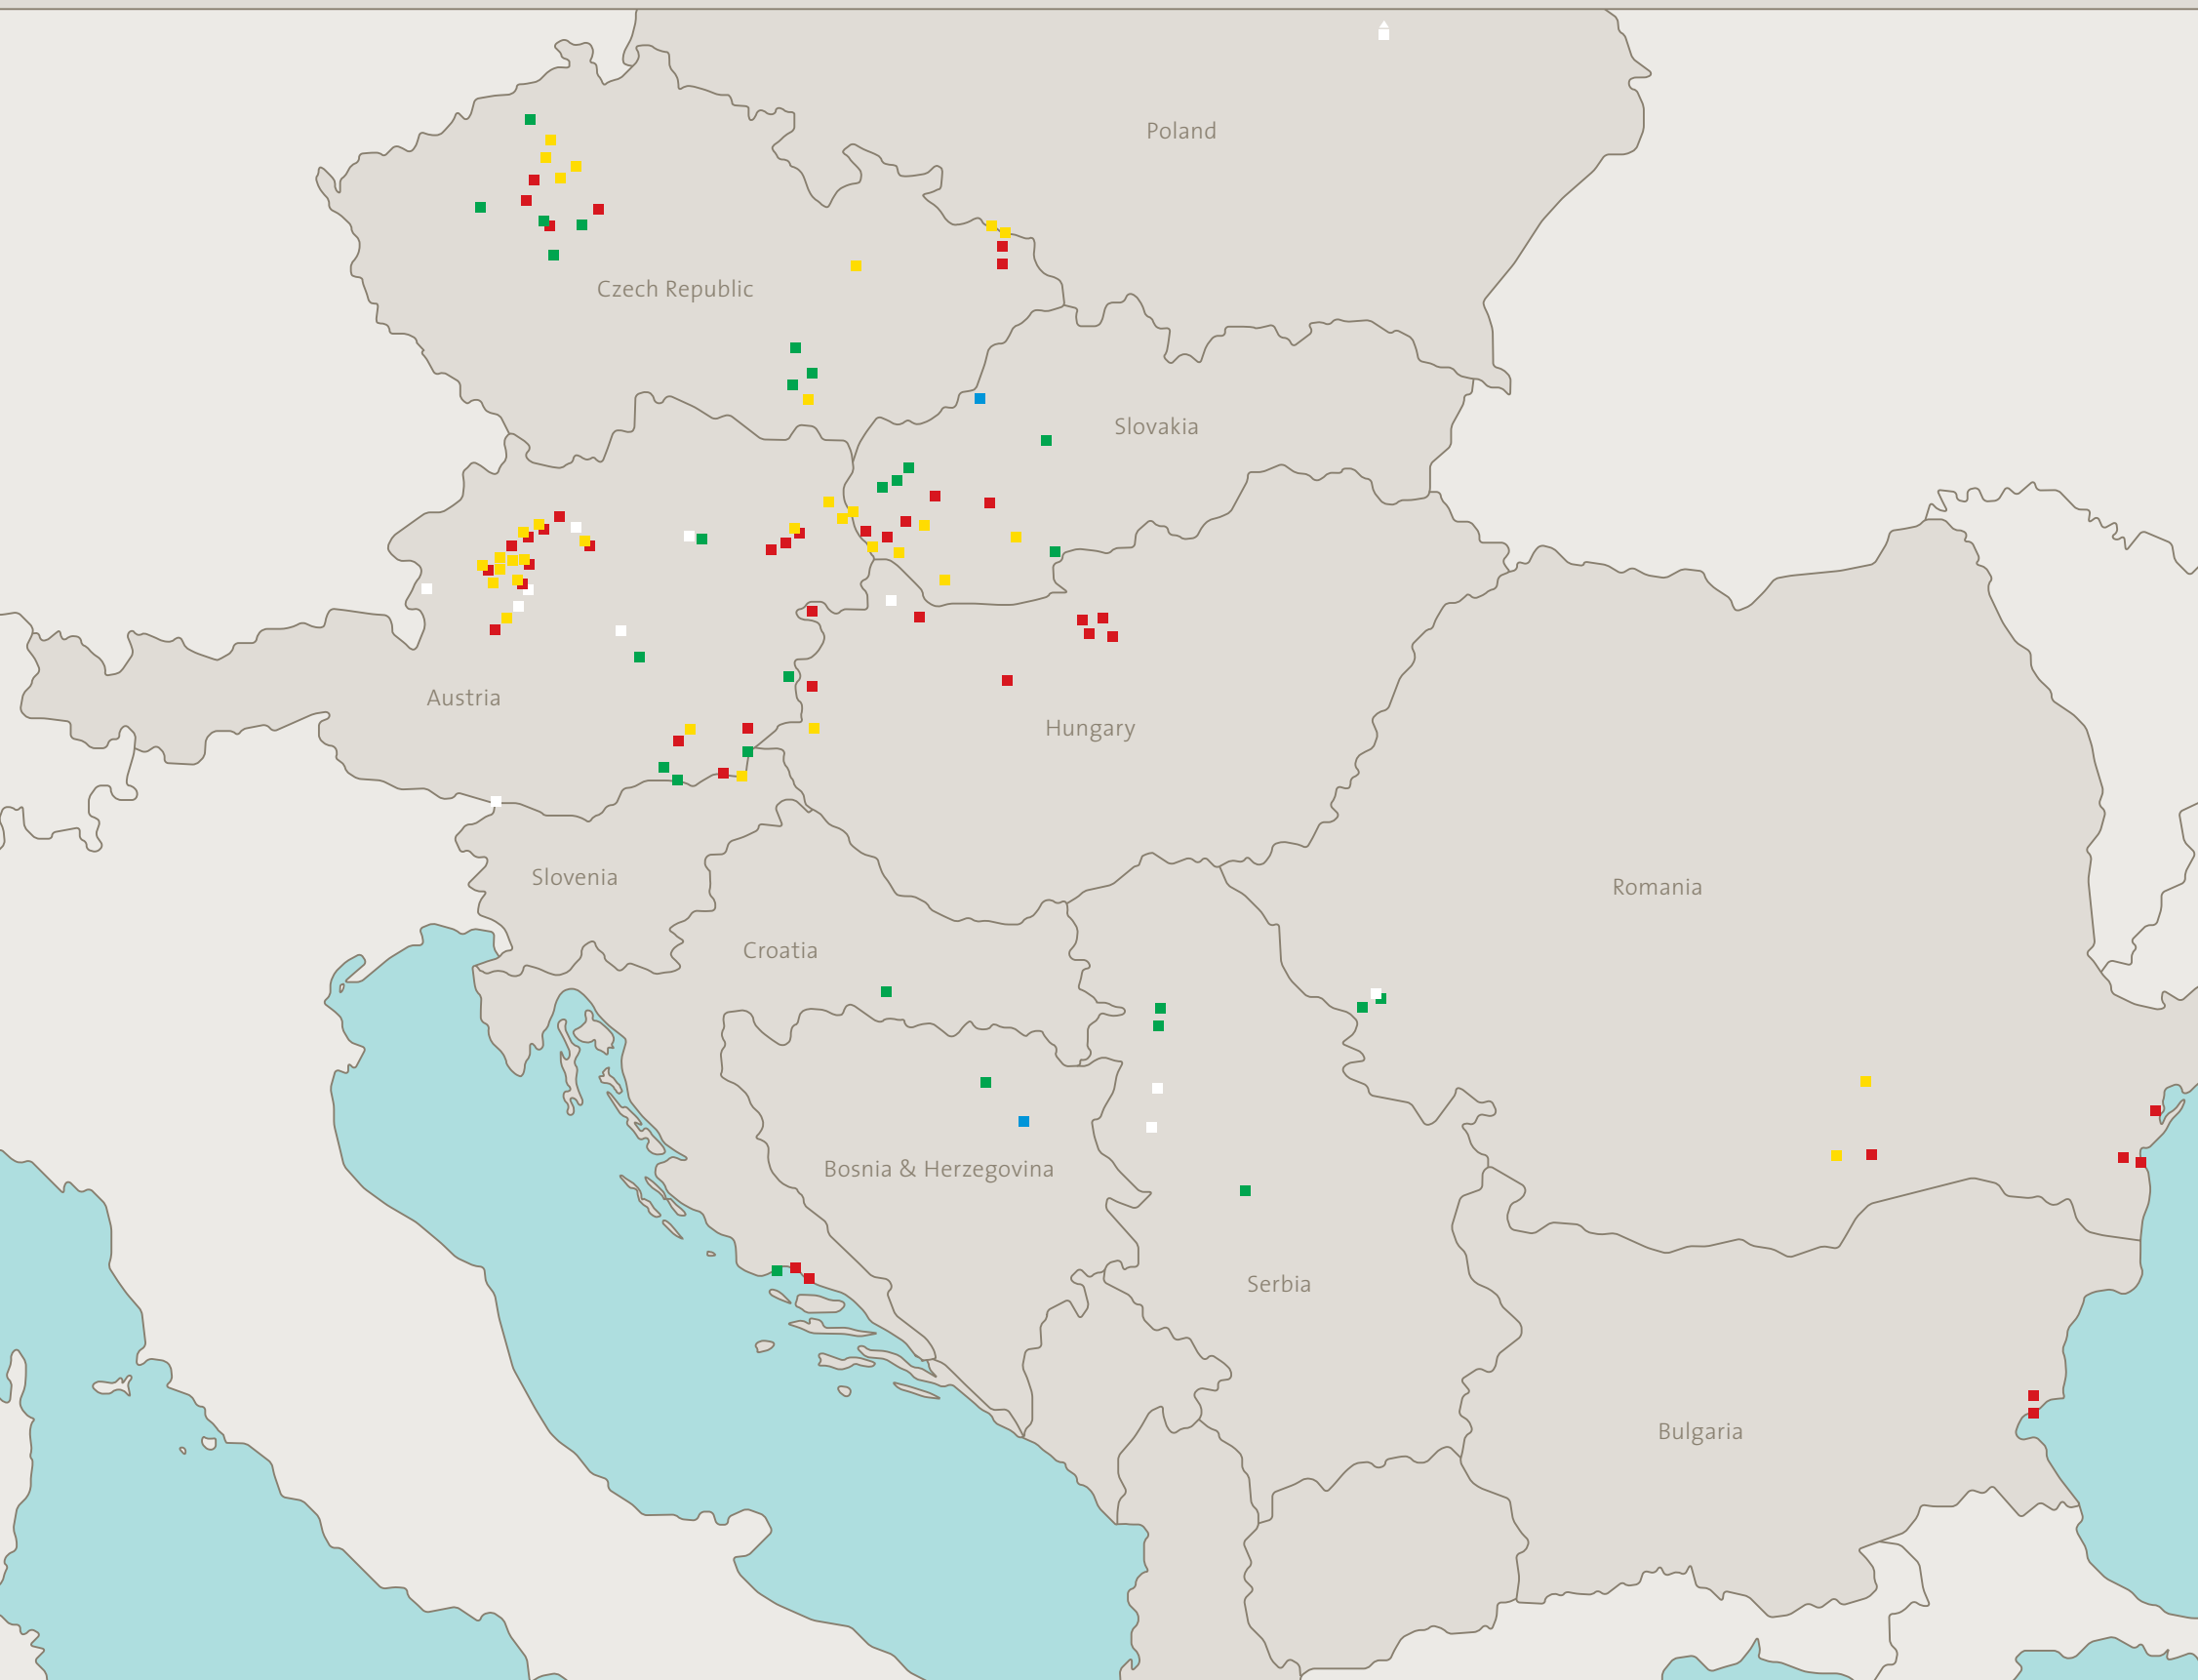

**Building materials** proving and preserving their value.

**Recycling** featuring maximum efficiency.

**Innovations** affording the lead of nature.

**Real estate** turning into locations of success.

**Tourism** cherishing the most beautiful regions.
